

## Latin to English Glossary

Latin	English
Atrioventricularis communis	Common atrioventricular valve
Chordae tendineae	Tendinous cords
Cor Triloculare Biatrium	Double inlet left ventricle
Cor-Triatriatum Dexter	Divided right atrium
Cor-Triatriatum Sinister	Divided left atrium
Crista supraventricularis	Supraventricular crest
Crista terminalis	Terminal crest
Dextrocardia	Right-sided heart
Ductus arteriosus	Arterial duct
Ductus venosus	Venous duct
Foramen ovale	Literally "oval hole", usually "oval foramen" is used
Fossa ovalis	Oval fossa
Inferior vena cava	Inferior caval vein
Levocardia	Left-sided heart
Mesocardia	Midline heart
Musculi pectinati	Pectinate muscles
Septum Primum	Floor of oval fossa or flap valve as well as its anterior rim
Septum Secundum	Postero-superior rims of oval fossa
Sinus venosus	Venous sinus
Sinus septum	Fold between inferior caval vein and coronary sinus
Situs Ambiguus	Either left or right isomerism
Situs inversus	Mirror image atrial arrangement
Situs Solitus	Usual atrial arrangement
Sulcus terminalis	Terminal Groove or sinoatrial groove
Superior vena cava	Superior caval vein
Truncus arteriosus	Common arterial trunk
